The Management of High-Level Radioactive Wastes

The disposal of high-level radioactive waste : I. What is high-level radioactive waste? The term high-level radioactive waste (HLW) generally refers to the highly radioactive wastes requiring permanent isolation from man's environment that arise as a byproduct of nuclear power generation.

The disposal of high-level radioactive waste

High-level radioactive waste management. High-level radioactive waste management concerns how radioactive materials created during production of nuclear power and nuclear weapons are dealt with. Radioactive waste contains a mixture of short-lived and long-lived nuclides, as well as non-radioactive

nuclides.
